ⁱ **General Government Sector** means that the agency is classified in Government Finance Statistics in the [General Government Sector](#).

- The GGS sector, public non-financial corporations and public financial corporations are classifications based on those used by the Australian Bureau of Statistics and comply with international standards.
- The primary function of entities classified in the GGS sector is to provide public services that are mainly non-market in nature, and for the collective consumption of the community, or that involve the transfer or redistribution of income. These services are largely financed through taxes and other compulsory levies, although user charging and external funding have increased in recent years.
- All Non-corporate Commonwealth entities are classified in the GGS sector.

ⁱⁱ **Material** means “material entity” as classified by the Department of Finance. This means that the body is included in the group of Commonwealth entities which together make up at least 99% of total revenues, expenses, assets and liabilities based on the audited financial statements of those entities amended for known changes to materiality. Material entities are required to produce more detailed financial information than non-material entities, for the purposes of providing monthly, end-of-year and estimates reports to the Department of Finance. 18 Departments of State are “material in nature”.
