

Australian Government Office Occupancy Report 2017: Detailed data tables for non-corporate Commonwealth entities with 500 square metres or more of usable office area

Key Findings

Overview

The 2017 Australian Government Occupancy Report (Occupancy Report) covers office accommodation leased or owned by non-corporate Commonwealth entities with at least 500 square metres of usable office area.

The Government property information in this report is collected through the Australian Government Property Data Collection (PRODAC) system, which non-corporate Commonwealth entities (entities) update each year.

Data collected through PRODAC provides an evidence base to assist entities to identify and progressively move to better property management practices, whilst also informing Government leasing policy.

This Occupancy Report sets out the occupational density for entities against the current target of 14 square metres (m²) of office space per occupied work point (14 m²/OWP). The Occupancy Report has been prepared using data provided by 76 entities for the 2016-17 Financial Year.

Key Findings

The results of the Occupancy Report highlight increased efficiency in the public sector's overall accommodation footprint, including a reduction in the office-space footprint, an increase in the number of tenancies achieving the occupational density target, and improved occupational density and fit-out density.

At 30 June 2017, there were 596 Australian Government owned or leased tenancies with owned or leased property with at least 500 square metres of usable office area.

Since 30 June 2016, the Commonwealth's total Net Lettable Area has decreased by 30,658 square metres (1.0 per cent).

As at 30 June 2017, 25.0 per cent tenancies met or exceeded the occupational density target of 14m², an increase from 22.1 per cent of tenancies in 2016.

The number of work-points rose by 2,735 (1.7 per cent) causing the proportion of occupied work-points to drop by 2.7 percentage points and the median work-point vacancy rate to increase by 1.5 percentage points.

The overall increase in work points is due to two factors: new tenancies having a much higher work-point density than the expired tenancies they are replacing, and existing tenancies adding workpoints.

Australian Government Office Occupancy Report 2017: Detailed data tables for non-corporate Commonwealth entities with 500 square metres or more of usable office area

Table 1: Comparison of property indicators for active Commonwealth tenancies

	2014	2015	2016	2017
Occupational density target (m ²)	14.0	14.0	14.0	14.0
Proportion of tenancies meeting the occupational density target (%)	12.9	13.0	22.1	25.0
Total net lettable area (m ²)	3,150,240	3,132,284	2,893,755	2,863,097
Total number of work-points	163,536	162,677	156,071	158,806
Proportion of occupied work-points (%)	78.4	79.1	86.5	83.8
Median occupational density (m ²)	20.7	20.3	17.6	17.8
Median work-point vacancy rate %	21.6	20.9	13.8	15.2
Median fit-out density (m ²)	15.6	15.6	15.2	14.6

Table comprises tenancies that were still active (in affect) at the end of the reporting period (excludes expired tenancies).

Background

The Department of Finance is responsible for co-ordinating PRODAC and reporting results in the Occupancy Report.
