

Comcover Launchpad Streamlines Services

Current as of July 2014

The Comcover Launchpad is a new addition to our services that is set to make doing business with us easier, simpler and faster.

The Launchpad combines a range of Comcover applications and services in one convenient location that Fund Members can access with a single sign-on.

With the Launchpad, there is no longer a need to remember multiple log-ins or passwords. Just enter user credentials at www.comcoverlaunchpad.com.au and use Launchpad to:

- access insurance documentation such as Schedules of Cover, Certificates of Currency and Asset and Expatriate schedules
- lodge all incident and claim
- generate incident and claims reports
- tap into our learning management system.

It's easy and convenient to use and designed to help Fund Members access information and manage their business with us when and where they want.

Access more resources

As well as Comcover's suite of services, you can also use Launchpad to access a range of useful resources including important risk management and insurance documents, training and professional development tools, and links to the Department of Finance website.

More features to come

As the demands of doing business continue to grow, Launchpad will help Fund Members keep pace with a range of new features to come on online later this year and into 2015.

This includes access to the Comcover Benchmarking Survey as well as a suite of new and updated training and reporting tools such as the Comcover Risk Scorecard.

The Comcover Risk Scorecard will provide a agency-specific reporting tool to provide a high-level snapshot of a Fund Member's risk exposure and capability.

It's designed to enhance the existing internal reporting processes of agencies, and to enable them to improve decision-making and the management of risks within the agency.

You can keep up-to-date with what's new through the Comcover Launchpad at www.comcoverlaunchpad.com.au or via our website www.comcover.gov.au
