March 2025

ASC BOARD PERFORMANCE REPORT

1. Game Plan (Top 6 Objectives)

s22

s22

The Enterprise Collaboration Deed (ECD) and Mobilisation Deed (MD) were executed on the 13th of November 2024, followed by the Tasking Statement on the 16th of December 2024. Both ASC and BAES are formally under contract to deliver scope identified by the Joint Statement of Work (JSOW). Following the execution of the documents both ASC and BAE have continued to mobilise in support of the delivery of the scope of work in line with the agreed milestone plan.

Since signing the Tasking Statement in December 2024, the first 3 months of the Tasking Statement period of performance has seen a combined effort across the program with teams split between finalising the contract, planning and initiating the program resource ramp up, developing ways of working for collaboration with our partner BAES, and commencing work on and achieving the first milestone with the first set of contracted deliverables.

Program Performance Overview

s47

The execution of the Joint Statement of Work is undertaken by integrated teams of ASC & BAES resources, with one set of deliverables jointly developed and approved by both participants.

s47

Contract Deliverables Performance

The Tasking Statement requires the Shipbuilder to deliver s47 over the period of contract performance. Each deliverable has been allocated to an IPT who will be responsible for the development and delivery on behalf of the Shipbuilder.

The team have defined a process to allow a consistent measurement of performance for each deliverable and this is used to track performance against the delivery schedule.

The Shipbuilder successfully delivered s47 CDRLS scheduled s47 and s47 CDRL scheduled s47 CDRLs are on track for delivery at the end of the month.
