Drafting Note:

This template is to be used with the Commonwealth Two Stage Process handbook and Quick Reference Guide to Two Stage Process. This template provides a general guide for Agencies. It is each Agency’s responsibility to ensure that all information relevant to the project is supplied.

Instructions to assist you to complete Initial Business Case are highlighted in grey. Please delete grey boxes and drafting notes prior to submitting your final Business Case.

1. **Executive Summary**

The executive summary in the business case should be a detailed summary of the proposal case being put forward. Executive summary will need to include an outline of the business case, analysis of the proposal and recommended option being proposed.

| Insert text |

2. **Project**

**Business Needs**

Insert Business Needs as identified in your organisation.

| Insert text |

**Project Scope**

Project Scope should define the project constraints and limitations at a high level.

| Insert text |

**Project Background**

Project background need to capture project’s history, current governance structure, prior decisions and considerations.

| Insert text |

**Project Assumptions**

Key assumptions or preconditions that should be taken into account when assessing the IBC should be summarised in this section for audit and analytical purposes. Detailed calculations, reasoning and supporting documentation should be provided as attachment.

| Insert text |

**Key Project Stakeholders**

Agencies to list key stakeholders, the possible concerns and proposed mitigation action. Stakeholder Management Plan to be included as an attachment.

| Insert text |
3. Project Requirements

Statement of Requirements
Project Requirements should define deliverables of the project and provide details on how the project will meet the project scope and business need.

Identification of Options to Meet Requirements
Early preliminary studies into 3-4 preferred options that should be proposed for Government to consider.

4. Risk Management

Risk Management Section can be represented in a table format. Risk Management Plan should be included as an attachment.

Implementation

Risk Assessment

Mitigation

Risk Costing (P50)

5. Cost Analysis

Comparisons of Options to Meet Requirements

Capital Infrastructure Costs

Risk Allowances (Contingency)

Funding Source Analysis

Whole of Life Costing
A summary of key findings in Whole of Life Costs for all preferred options are to be included in this section. Detailed Whole of Life Cost is to be included as an attachment.
Cost Benefit Analysis

Socio Political Economical Analysis

Cash Flow Statements and Drawdown Schedule
Agency should include a high level Cash Flow Statement and Drawdown Schedule for all preferred options.

6. Recommendation

Preferred Option

Project Schedule

Project Delivery Strategy

Proposed Governance Structure and Accountabilities
Any proposed changes to governance for the development of Detailed Business Case to be included in this section. This section is optional, please delete if not required.

Other Considerations

7. Scoping Study

Development of Detailed Business Case
This section should provide details on how the Second Stage Detailed Business Case is to be managed and costs associated with the development of the Detailed Business Case.
8. Authorisation
Submission of an Initial Business Case for the Second Stage approval of a non-Infrastructure Capital Works project should be authorised by the sponsoring agency’s Chief Executive Officer and Chief Financial Officer.

We hereby authorise the submission of this Detailed Business Case for [insert project title].

Chief Executive Officer
